Project Guide**

ACKNOWLEDGEMENT

A project usually falls short of its expectation unless aided and guided by the right persons at the right time. We avail this opportunity to express our deep sense of gratitude towards Mr. Prashant Karhale (Center Coordinator, IACSD, Pune) .

We are deeply indebted and grateful to them for their guidance, encouragement and deep concern for our project. Without their critical evaluation and suggestions at every stage of the project, this project could never have reached its present form.

Last but not the least we thank the entire faculty and the staff members of Sunbeam Institute of Information Technology, Pune for their support.

Ranjit Gaikwad (1161)

Savita Gujare(1182)

IACSD Pune

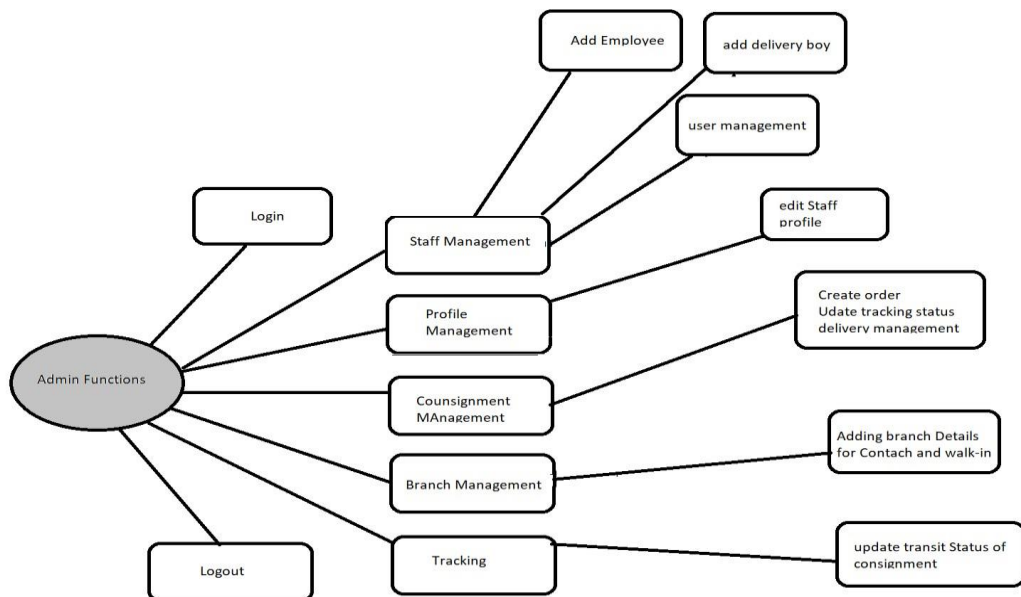

INTRODUCTION TO PROJECT

This Courier Service Management Project will have different modules. The login section will have login facility for the admin and for the user who will operate this system. While taking orders from its customers, it will take all the details of its customers who is placing the orders and all the details for the recipient such as its address, name, mobile number. During billing process system will generate a tracking id for their products. Through this tracking id, customers or its recipient will able to track their products from any location using internet.

2.REQUIREMENTS

2.1 FUNCTIONAL REQUIREMENTS

2.1 Admin Account

2.1.1 Functionalities of Admin:

1. Login:

The admin has his own independent login page , he has to enter the email, password for login, after successful login he will be directed to the admin board page.

2. View Courier Status:

Here the admin will be able to view all the status of the couriers
(Booked,dispatched,delivered,in transit)

3. View courier details:

Here the admin will be able to see all the details of the courier, like the sender and receiver details and package details.

| 0 | Status | Varchar | 20 | 1 |
| 0 | Tracking_id | Varchar | 100 | 1 |
| 0 | Upd_date | date | | 1 |

E-R Diagram

4. CODING STANDARDS IMPLEMENTED

Naming and Capitalization

Below summarizes the naming recommendations for identifiers in Pascal casing is used mainly (i.e. capitalize first letter of each word) with camel casing (capitalize each word except for the first one) being used in certain circumstances.

| Identifier | Case | Examples | Additional Notes |
|------------------------------------|--------------------------------|-------------------------------------|---|
| Class | Pascal | Person, BankVault, SSMMessage, Dept | Class names should be based on "objects" or "real things" and should generally be nouns . No ‘_’ signs allowed. Do not use type prefixes like ‘C’ for class. |
| Method | Camel | getDetails, updateStore | Methods should use verbs or verb phrases. |
| Parameter | Camel | personName, bankCode | Use descriptive parameter names. Parameter names should be descriptive enough that the name of the parameter and its type can be used to determine its meaning in most scenarios. |
| Interface | Pascal with "I" prefix | Disposable | Do not use the ‘_’ sign |
| Property | Pascal | ForeColor, BackColor | Use a noun or noun phrase to name properties. |
| Associated private member variable | _camelCase | _foreColor, _backColor | Use underscore camel casing for the private member variables |
| Exception Class | Pascal with "Exception" suffix | WebException, | |

Comments

- Comment each type, each non-public type member, and each region declaration.
- Use end-line comments only on variable declaration lines. End-line comments are comments that follow code on a single line.
- Separate comments from comment delimiters (apostrophe) or // with one space.
- Begin the comment text with an uppercase letter.
- End the comment with a period.
- Explain the code; do not repeat it.

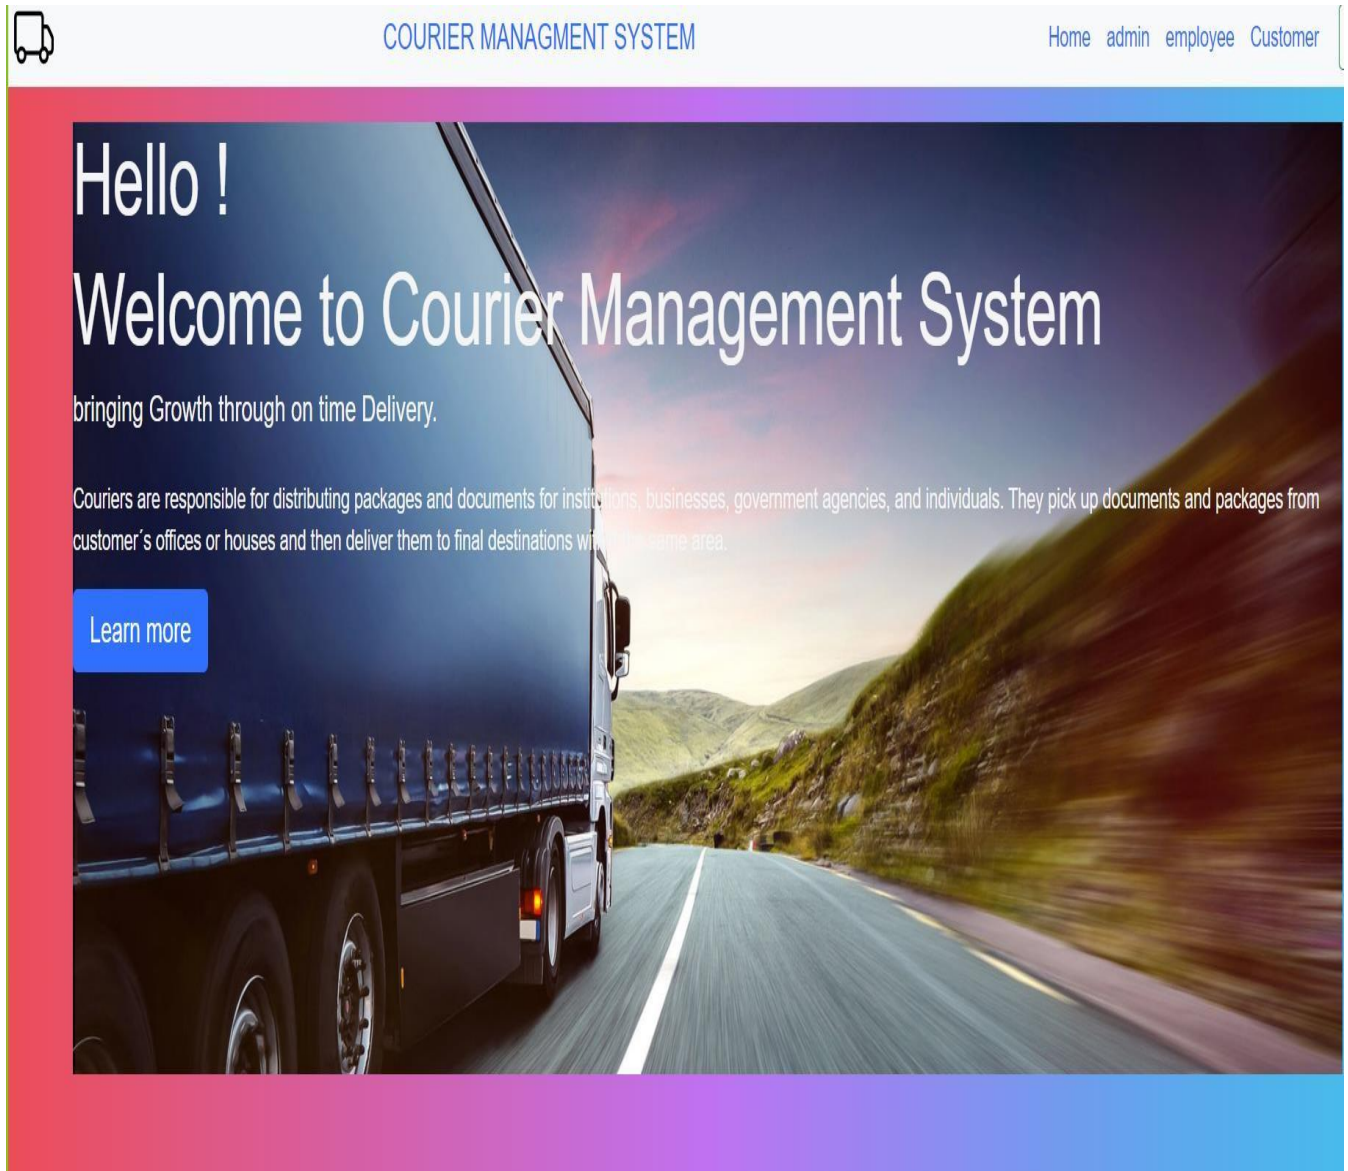

5. TEST REPORT

GENERAL TESTING:

| SR-NO | TEST CASE | EXPECTED RESULT | ACTUAL RESULT | ERROR MESSAGE |
|-------|--------------------------------|---|---------------|--|
| 1 | Register Page | Redirected to Next page | OK | Nothing |
| 2 | Login Page | Pop-up will come | Ok | Please enter username and password again . |
| 3 | Reset login | Only users password will be reseted | Ok | Nothing |
| 4 | Quick search Courier | Gives all Courier details | Ok | Nothing |
| 5 | Booking Courier | All the fields should be filled for submission | Ok | Nothing |
